★ WELCOME TO THE ENTERPRISE BUSINESS CENTER OF LOUISIANA ★

Welcome to The Enterprise Business Center of Louisiana! As President and CEO, it is my honor to welcome you to a thriving community of innovators and small business owners who are determined to grow, create, and impact our region in profound ways.

Small businesses are a cornerstone of the U.S. economy, and you are now a part of an incredibly important movement. Across the nation, there are approximately **33.2 million small businesses**, accounting for an astounding **99.9% of all U.S. businesses**. These businesses employ around **61.7 million people**, making up nearly **46.4% of the total workforce**. This means that your entrepreneurial efforts not only support your personal goals but also contribute to the nation's economy by creating jobs, driving innovation, and building stronger communities.

We understand that the path to success is not always easy. While approximately **80% of small businesses** survive their first year, the numbers taper as time progresses, with **50% of businesses** reaching their five-year anniversary and about **33%** making it to ten years. These statistics underscore the importance of planning, resilience, and access to proper resources—which is exactly where The Enterprise Business Center of Louisiana comes in.

We are committed to supporting small businesses like yours with the resources, mentorship, and educational programs necessary to help you thrive. Whether you're navigating the challenges of managing finances, expanding your customer base, or scaling operations, our team is here to assist you every step of the way. Our business incubator is specifically designed to help entrepreneurs overcome challenges and increase the likelihood of long-term success.

One of the most exciting aspects of the current small business landscape is its diversity. Approximately **42%** of all U.S. businesses are **women-owned**, and **18.3%** are **minority-owned**. We are proud to support this diversity, providing a welcoming and empowering environment where business owners from all backgrounds can flourish. Additionally, Louisiana's small business community continues to expand across a range of industries, including **professional services (14.5%)**, **retail (13%)**, **construction (12.4%)**, and **healthcare (9.2%)** — all vital sectors in our local economy.

As you embark on this exciting journey with us, know that The Enterprise Business Center of Louisiana is dedicated to helping you achieve your business goals. We provide essential tools for growth, from strategic workshops to personalized consulting, to ensure you are well-equipped to succeed in an ever-changing marketplace.

Thank you for trusting us to be a part of your entrepreneurial journey. We look forward to supporting your growth and celebrating your successes along the way. If you are a visitor with us today I invite you to become a community member and enjoy our many amenities we offer to the community.

Sincerely,

Dr. Steven T. Castille

COWORKING OFFICE SPACES

The Enterprise Business Center

www.EBC70520.com

WHAT IS COWORKING?

Coworking is a term used to describe a working arrangement in which people from different teams and companies come together to work in a single shared space.

The first coworking spaces began appearing in the early 2000s. They attracted mostly self-employed freelancers and web entrepreneurs searching for an alternative to working from coffee shops, business centers, and home offices.

Since then, coworking has become a global phenomenon, and coworking spaces themselves have evolved to keep up with the changing ways we work. Today, they're used by everyone from individuals working remotely to entire corporate teams.

Coworking space is characterized by shared facilities, services, and tools. Sharing infrastructure in this way helps to spread the cost of running an office across members, but coworking spaces are more than just a way of reducing overhead.

Join us and get a **virtual office** with coworking office space today!

WHAT HAPPENS AT A COWORKING OFFICE SPACE?

At a coworking space, people with a variety of professions gather to work side-by-side. Though they may have unrelated work, members often exchange ideas, give feedback, and offer encouragement. Some members even work on projects together! Coworking office space is a great environment for fostering this kind of collaboration. And there's more.

A coworking space is much more than a physical place to get work done. One of the main values of coworking lies in the community of members. People at coworking office spaces readily socialize, build friendships and help each other professionally. These connections form through several means.

Coworking spaces encourage people to connect by organizing events. Community managers frequently put on social and professional events for members to meet and mingle. It's common for members to bump into each other and spark up conversations both personal and professional. This creates an environment where people build genuine connections.

WHY IS A CONFERENCE ROOM IMPORTANT?

A conference room creates a quiet environment without distractions, which allows everyone in the room to focus. Not only that, but you'll be able to hear one another, too. You can get down to business with ease, without the distractions and noise of a public space. One of the most important benefits of conference and meeting rooms is that they give off an air of professionalism. This is pertinent when you're trying to make a good first impression.
